

CUSTOMER ALERT!

PowerSchool Field Migration Could Impact Your Alert Solutions Account

As you may already know, PowerSchool released a [Tech Note](#) last October calling for a **mandatory migration of PowerSchool custom fields** by March 31, 2017.

This mandatory migration could impact your Alert Solutions configuration within PowerSchool and prevent you from being able to send messages.

To ensure your school does not experience any issues, please contact us when your migration is complete. If you have already completed this migration, [please contact us immediately](#).

Best Regards,
